

Silane LS-MMOS

Description:

Chemical Name: Methymethoxybis(methyl ethyl-ketoximino)silane

Typical Technical Properties:

Appearance: Colorless to light yellow transparent liquid	Purity(%): 95
	Density(25°C, g/cm ³): 0.96

Applications:

Methylmethoxybis(methyl ethyl ketoximino)silane is an organosilicon compound utilized primarily as a crosslinking agent in the production of room-temperature vulcanizing (RTV) silicone rubbers. This compound features functional groups that facilitate moisture-curing reactions, enabling the formation of durable elastomeric materials upon exposure to atmospheric moisture.

Package &Storage:

In 200L drum, 1000L IBC.

Keep in cool, dry and ventilated place. Keep away from sunlight and fire sources. Keep away from acid and alkali. Keep in unopened containers.

Storage beyond the shelf life does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.
